MASooda Week 6 figure style sheet (synthetic data)

Palette

Architectures

- Hierarchical #0072B2
- Centralized #E69F00
- Decentralized (undefended) #009E73

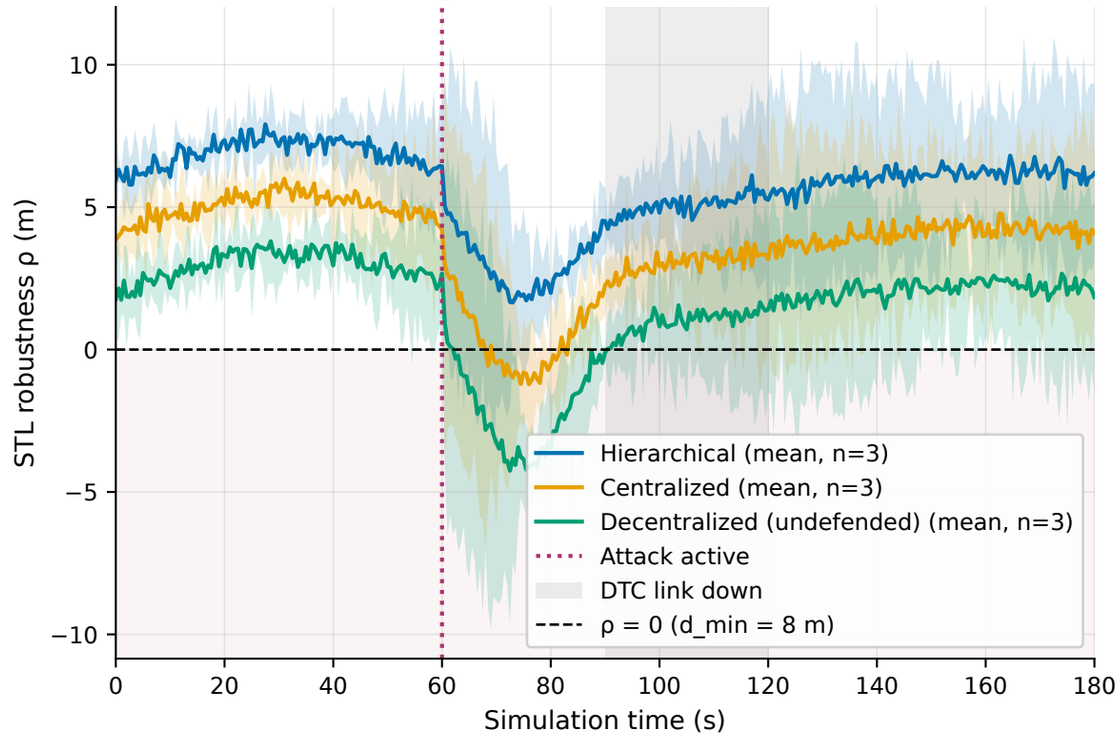

Agent types

- Emergency #D55E00
- eVTOL #56B4E9
- Delivery #CC79A7

Events

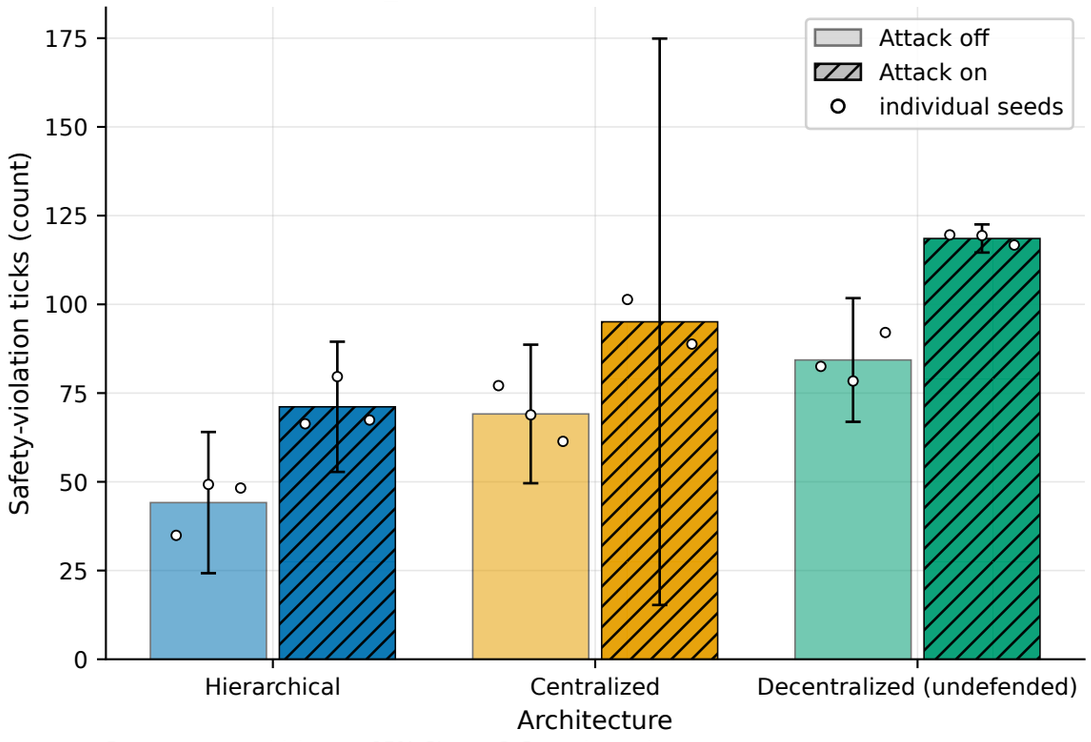

- Attack active #AA3377
- DTC link down #7F7F7F
- Safety violation #B2182B

robustness_timeseries: ρ(t) by architecture

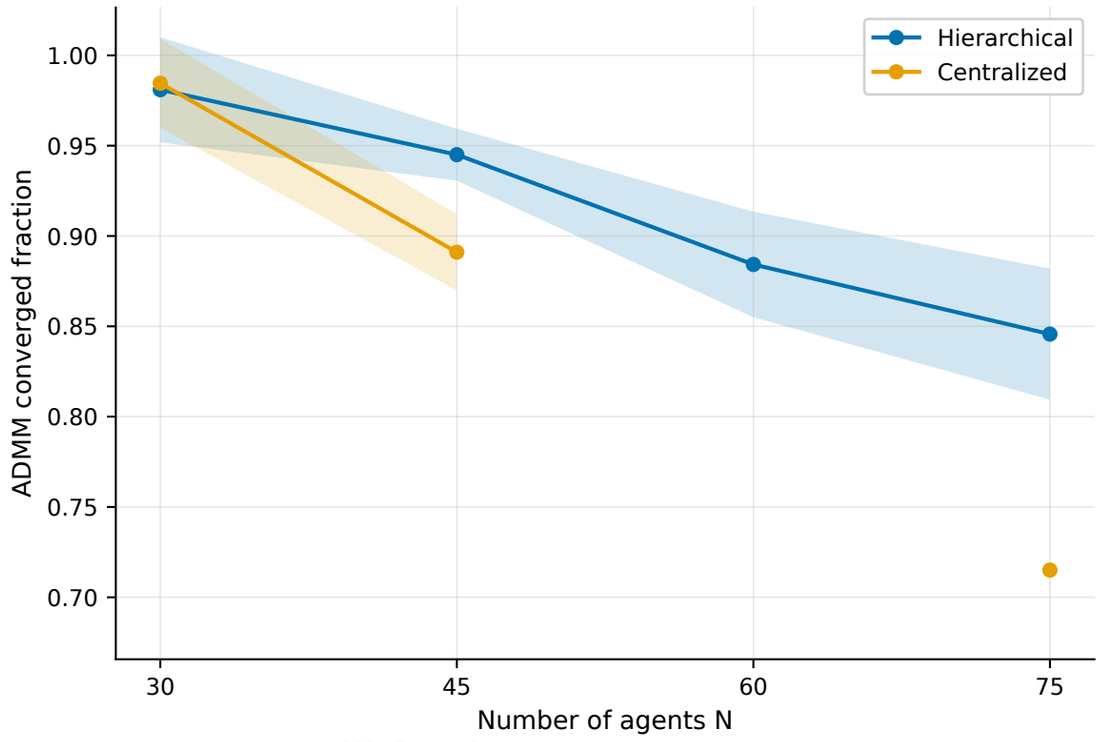

ρ(t) = min pairwise separation − d_min; line = mean, band = 95% CI across seeds; n = 3 seeds per line

metric_bars: violations, attack off vs on

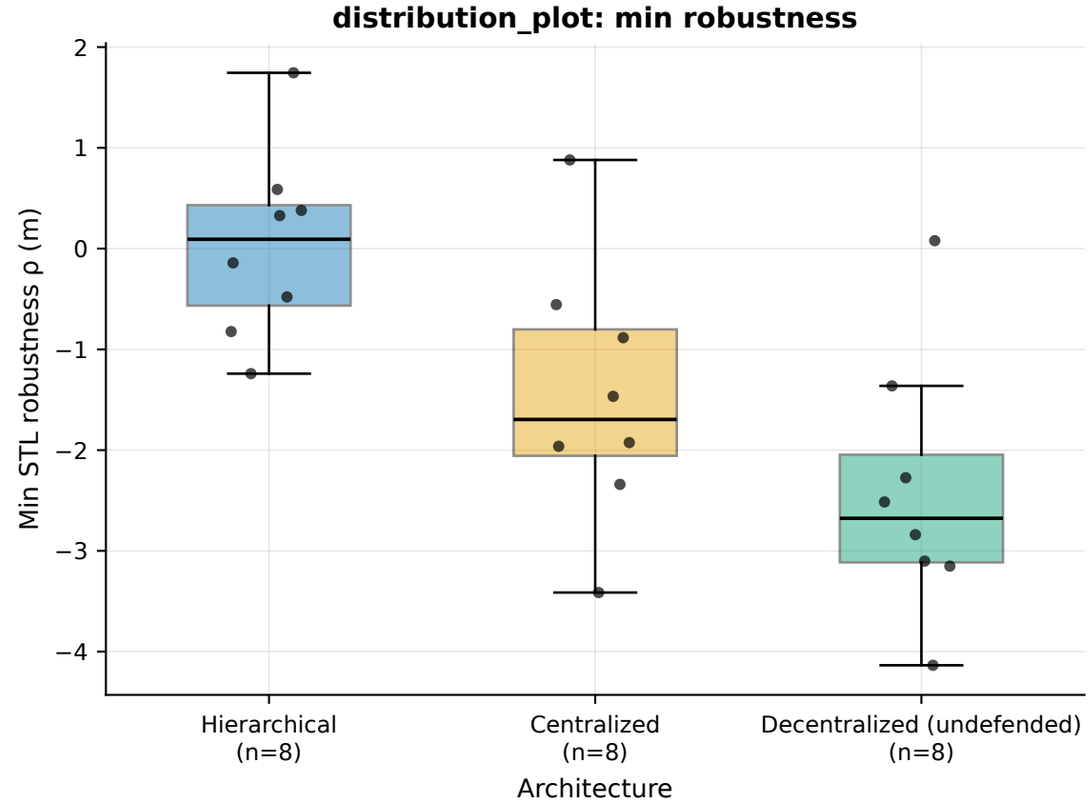

Bars = mean, whiskers = 95% CI; n = 2–3 seeds per bar

metric_vs_param: convergence vs N

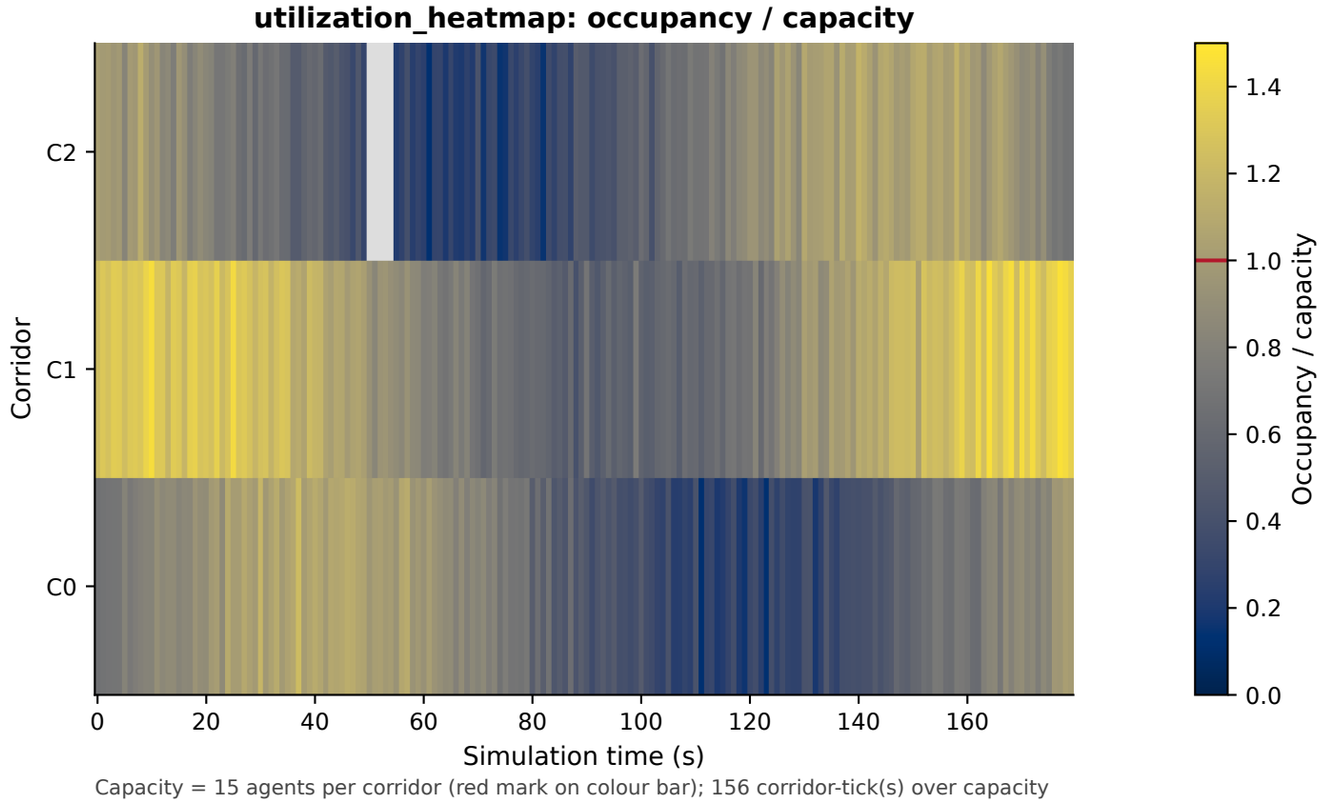

Line = mean, band = 95% CI; n = 3 seeds per point; 1 point(s) n/a (gap in line)

distribution_plot: min robustness

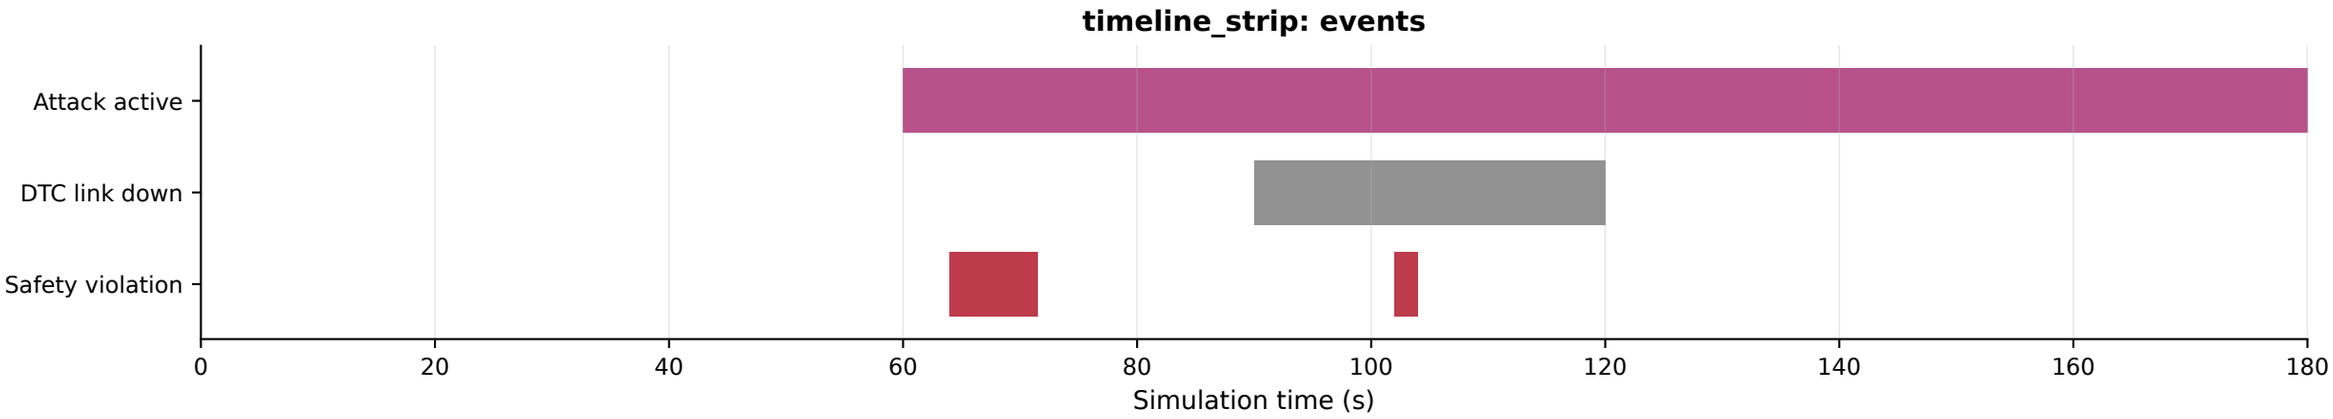

Box = median and quartiles, whiskers = 1.5 IQR, dots = individual runs; 1 n/a value(s) excluded

utilization_heatmap: occupancy / capacity

Capacity = 15 agents per corridor (red mark on colour bar); 156 corridor-tick(s) over capacity

timeline_strip: events

PROVISIONAL - pre-bug-fix results
